1. Go to www.dadeschools.net and click on Parent Resources tab

The screenshot shows the Miami-Dade County Public Schools website. The header includes the district logo, name, and tagline, along with a language dropdown and a search bar. The main navigation bar lists various links. A large banner for the Superintendent's Opening of Schools Address is featured. Below this, four main content areas are displayed: Back-to-School Resources, Student Registration and Enrollment, Find your School, and COVID-19 Dashboard. At the bottom, a footer section titled 'M-DCPS at a Glance' contains links to Resources, Accessibility Statement, Parent Resources (highlighted with a red arrow), FortifyFL, and Site Map. An accessibility icon is also present in the footer.

M-DCPS Acceptable Use Policy

Purpose of the rule

The purpose of this rule is to establish a policy for the acceptable use of the network as a tool for learning in Miami-Dade County Public Schools (M-DCPS) (hereinafter referred to as District). The M-DCPS network is defined as all computer resources, including software, hardware, lines and services that allow connection of District computers to other computers, whether they are within the District or external to the District.

This includes connection to the Internet. In summary, the rule affirms that no user may use the network to take any action or receive and/or communicate any language that the employee or student could not take or communicate in person. Users are defined as anyone authorized by administration to use the Network. This includes, but is not limited to, staff, students, parents, vendors, contractors, and volunteers. Prohibitions in applicable federal, state and/or local law or regulation, collective bargaining agreements and Board Rules are included. Additionally, this rule reflects that there is no expectation of privacy in the use of e-mail or network communications when such communications occur over M-DCPS provided equipment by M-DCPS employees, students, or others.

Purpose of Access to the Network

Networks give schools the ability to share educational and research resources from around the world with all students. These resources include access to instructional applications, interactive collaboration between teachers, students and other users, document sharing, communications of all forms with people from around the world and libraries, museums and research facilities.

I. Acceptable Use Policy

Utilization of the network by users must be in support of and consistent with the educational objectives of the District. When
